

Terms and Conditions for Downloading and Using the FLT-based Cryptography Programs on this Website

Welcome to our platform where you can download our Finite Lab-Transform (FLT)-based cryptography programs. Before you proceed with the download, please carefully read and agree to the following terms and conditions, as they govern the use of these programs:

1. Ownership and License: The FLT-based cryptography programs provided here are the property of the inventor and developer of the FLT, and they are protected by relevant patent laws. By downloading and using these programs, you acknowledge that you do not acquire any rights to the FLT itself, nor are you granted any license to distribute, sell, incorporate, or use the FLT for cryptographic purposes. The FLT is protected by US Patents and by Copyright. Please contact us at admin@labcipher.com if you have any questions about authorization to use one of the programs or the FLT.

2. Purpose of Use: These programs are intended solely for testing, demonstration, and research purposes. You must not use them for operational purposes, commercial use, distribution, sales, export, incorporation in other software or any activity not explicitly permitted under these terms and conditions.

3. No Warranty: The FLT-based cryptography programs are provided "as is," and we offer no warranty whatsoever regarding their correctness, effectiveness, or fitness for any specific purpose. You agree to use the programs at your own risk, and we shall not be held responsible for any damages, losses, or liabilities resulting from their use.

4. Source Code and Licensing: The programs are derived from publicly available software, often accompanied by their own licensing agreements. In cases where applicable, the original license statements are included in the source code. Any modifications made to the original programs are patent protected, and the corresponding patent numbers are included in the license statement. If you wish, you may modify the programs by removing the FLT-related code. In that case the original license agreement will apply.

5. Reverse Engineering and Modifications: You are allowed to reverse engineer and/or modify the programs for experimental use only. However, you are strictly prohibited from applying any modifications that utilize the FLT for commercial cryptographic purposes.

6. Data Protection and Data Loss: The programs may be provided with limited data and keywords for demonstration purposes. You should be aware that using the software on your data, despite not being authorized for data protection purposes, is solely at your discretion. We cannot be held responsible for any data loss or damage that may occur while using the programs. Additionally, we will not attempt to recover any lost user-defined input.

7. Brute Force and Security: While the security of these programs is limited, substantial brute force action exceeding 2^{64} may be required, an impractical number of attempts, to recover data, when keywords and other input data is lost. We do not guarantee or take any responsibility for the security of your data when using these programs for any purpose.

8. Patent Information: The FLT is presently covered by specific US patents. Any use, distribution, incorporation or modification of the FLT for commercial cryptographic purposes is strictly prohibited. The FLT is covered by pat. US 11336425; pat. US 11093213; and pat. US 10515567. The software also has patents pending. We consider the software marked in accordance with 35 U.S.C. § 287(a).

9. What do IP Rights on FLT in Cryptography mean?

What does it mean that the FLT has patent protection in cryptography applications?

It means you cannot apply the FLT in machine cryptography. If you like the FLT and design your own FLT computer application, you infringe. It is as simple as that.

For practical purposes, I cannot look into your computer. Also, you may find yet undisclosed applications of the FLT in cryptography. Patent law is such that novel FLT applications in cryptography may be patented, while still infringing my patents.

Your best approach is to contact me at admin@labcipher.com if you need a license. What I would not do, is apply the FLT in cryptographic software and distribute it without a license. In that case you violate the terms and conditions of this agreement.

10. Compliance and Responsibility: By downloading and using the FLT-based cryptography programs, you agree to comply with these terms and conditions and all applicable laws and regulations. You assume full responsibility for any consequences arising from your use of the programs.

11. The Intent of Terms and Conditions: The intent of the terms and conditions is to protect the Intellectual Property Rights related to the FLT and to deny any liability for

using this software.. Reasonable use, experimentation and demonstration is allowed. Just comply with the spirit and the letter of these Terms and Conditions.

12. Disclaimer of Liability: In no event shall we or the Inventor be liable for any direct, indirect, incidental, special, exemplary, or consequential damages (including, but not limited to, loss of time, loss of data, or damage to equipment) arising out of or in connection with the use or inability to use the FLT-based cryptography programs, even if advised of the possibility of such damages. You acknowledge and agree that any use of the programs is at your own risk, and you shall be solely responsible for any consequences resulting from such use.

This disclaimer of liability applies to all damages or injuries, whether based on warranty, contract, tort, strict liability, or any other legal theory. It extends to me, my affiliates, employees, agents, and any third-party contributors to the software.

13. Indemnification: You agree to indemnify and hold the inventor/developer harmless from and against any and all claims, liabilities, damages, losses, and expenses, including reasonable attorney's fees and costs, arising out of or in connection with your use of the FLT-based cryptography programs or your breach of these terms and conditions.

By downloading and using the FLT-based cryptography programs, you acknowledge that you have read, understood, and accepted these terms and conditions, including the disclaimer of liability and indemnification clauses.

14. Acceptance of Terms: By entering the provided password ("I agree with the terms and conditions") to access the downloadable zip files and related content, you indicate your acceptance of these terms and conditions.

We reserve the right to update and modify these terms and conditions at any time without prior notice. It is your responsibility to review these terms periodically for any changes.

If you do not agree with any part of these terms and conditions, you must not download, install, or use the FLT-based cryptography programs.

Thank you for your cooperation and understanding. Happy testing and researching!
